

Spring and Summer Internships

About Liqui-Grow:

Liqui-Grow is a family owned full-service Ag retailer who sells and custom applies crop inputs on about 1.5 million acres annually in eastern IA, northwest IL and southeast WI. Liqui-Grow is unique given they manufacture their own fertilizers, which include liquid suspension and full lineup of in-furrow and 2x2 starter fertilizers.

Description:

We are seeking qualified interns to apply for internship positions at various Liqui-Grow locations. These positions are great opportunities for individuals to experience Ag retail and crop production while working with a team of professionals. Soil sampling, crop scouting, and customer interaction will be a key components of the internship.

Internship Responsibilities:

- Participate in training activities pursuant to gaining knowledge of the products and their benefits to the customers.
- Assist with moving trailers/equipment/seed during the growing season.
- Utilize agronomic technology to do the necessary scouting of the customer's fields to develop the proper recommendation for fertilizer and pesticides applications.
- Visit with growers to discuss field observations.
- Scout seed and fertilizer plots with weekly reports on crop progress/differentials.
- Insure application equipment has the necessary safety equipment and is utilized at all times.
- Meet with manager daily to discuss plans & be prepared to work the occasional weekend – weather dependent.

Requirements:

- Must pass a pre-drug test
- Must have a good driving record
- Applicator's License/CDL-Twin State, Inc. will facilitate – preferred but not required
- Application/Ag Equipment experience is ideal
