

Retail Spring and Summer Internships

About Liqui-Grow

Liqui-Grow is a family-owned full-service Ag retailer who sells, and custom applies crop inputs on about 1.5 million acres annually in eastern IA, northwest IL, and southwest WI. Liqui-Grow is unique given they manufacture their own fertilizers, which include liquid suspension and a full lineup of in-furrow and 2x2 starter fertilizers.

Description

We are seeking qualified interns to apply for internship positions at various Liqui-Grow locations. These positions are great opportunities for individuals to experience Ag retail and crop production while working with a team of professionals. Soil sampling, crop scouting, and customer interaction will be a key part of the internship.

Internship Responsibilities

- Participate in training activities pursuant to gaining knowledge of the products and the benefits to the customers.
- Assist with moving equipment and seed during the growing season.
- Utilize agronomic technology to do the necessary scouting of the customer's fields to develop the proper recommendations for fertilizer and pesticide applications.
- Visit with growers to discuss field observations.
- Scout seed and fertilizer plots with timely reports on crop progress/differentials.
- Ensure application equipment has the necessary safety equipment and is utilized at all times.
- Meet with manager daily to discuss plans and be prepared to work the occasional weekend – weather dependent.

Requirements

- Must pass a pre-drug test
- Must have a good driving record
